Responsive web design development using HTML/CSS

#### ● CCNA Network Fundamentals

From May 2013 to June 2013 MIT Mekelle  
-Basic Networking Skills.

## Work experience

### ● Core Banking System Administrator

Since December 2018 [Global Bank Ethiopia](#) Addis Abeba, Ethiopia

- **Core Banking System Support:** I am responsible for continuously monitoring the FLEXCUBE core banking application and its associated databases to ensure operational stability and resolve issues promptly. My daily tasks include supporting essential banking operations, such as executing Day End, Month End, and Year End processes, to ensure accurate financial closeouts. Additionally, I define, configure, and test new FLEXCUBE products—including account classes, Switch products, and user-defined fields (UDFs) for management reporting—and make amendments to existing products based on department requests. A key part of my role involves troubleshooting and resolving system-related issues to maintain high availability and performance. I also actively participate in integration projects to facilitate seamless connectivity with other systems and services. Furthermore, I manage user roles within FLEXCUBE, ensuring that access permissions align with each user's position to maintain security and compliance standards. Also, i am responsible to communicate oracle support for any issues above our scope.
- **Oracle Database Tasks:** Responsible for performing a range of tasks within the Oracle database, including data manipulation, updates, and running necessary queries. This also involves actively monitoring the overall health of the database to ensure optimal performance, identifying and resolving any issues that arise, and supporting data integrity and security.
- **Report Generation and BI Publisher Updates:** Developing and deploying vital financial reports on the report server application (Oracle business Intelligence) and also managing the user rights on BI Publisher.
- **Monitoring the FLEXCUBE core banking web server application – Weblogic:** Primarily responsible for tracking the status of managed servers, identifying warnings, and detecting when servers are down. This includes monitoring deployed services to ensure they are functioning correctly, troubleshooting any issues, and performing restarts as needed to maintain service availability.
- **Bank Website Administration using WordPress:** Administering the bank's website involves tasks such as content management, site maintenance, security updates, plugin management, and ensuring the website's functionality aligns with the bank's goals and objectives.
- **SMS System Administration:** Managing the SMS system involves overseeing the sending and receiving of text messages for various purposes such as transaction alerts, account notifications, and marketing campaigns. This may include configuring message templates, managing subscriber lists, monitoring message delivery, and troubleshooting any issues that arise with the SMS system.
- **Cheque Point System Support:** Providing support for the Cheque Point System involves assisting users with tasks related to cheque processing and management.
- **Inhouse Developed systems:** I have also participate on some of the inhouse developed systems with [Asp.net](#) core and MVC C# developed, upgrade projects including support for the users and also taking scheduled backups for the databases.

## Work experience

### Junior Information Technology Engineer

From October 2014 to June 2015 [Ethiopian Revenue and Customs Authority](#) Addis Abeba, Ethiopia

- Application Support in the company systems.
- Perform Backup in the database.
- Network installation and Network Administration.
- Computer Hardware Maintenance.
- Perform Server Status Check.

### Contact Center Advisor

From June 2015 to December 2018 [Ethio Telecom](#) Addis Abeba, Ethiopia
